## DS2500 Self-Reflection Assignment 1

### **Does this work reflect your best effort?**

Yeah, I think so.

### **What was the most challenging part of the assignment?**

Honestly, formatting my graphs takes the longest probably every time. The matplotlib documentation is kind of overly verbose and a little hard to look through, and a good amount of the examples on stack overflow are pretty specific in nature so it's hard to learn what I need to learn from them.

### **What function(s) or problem(s) would you like feedback on and why?**

I don't really have any questions about what I did or how it should have been accomplished.
